

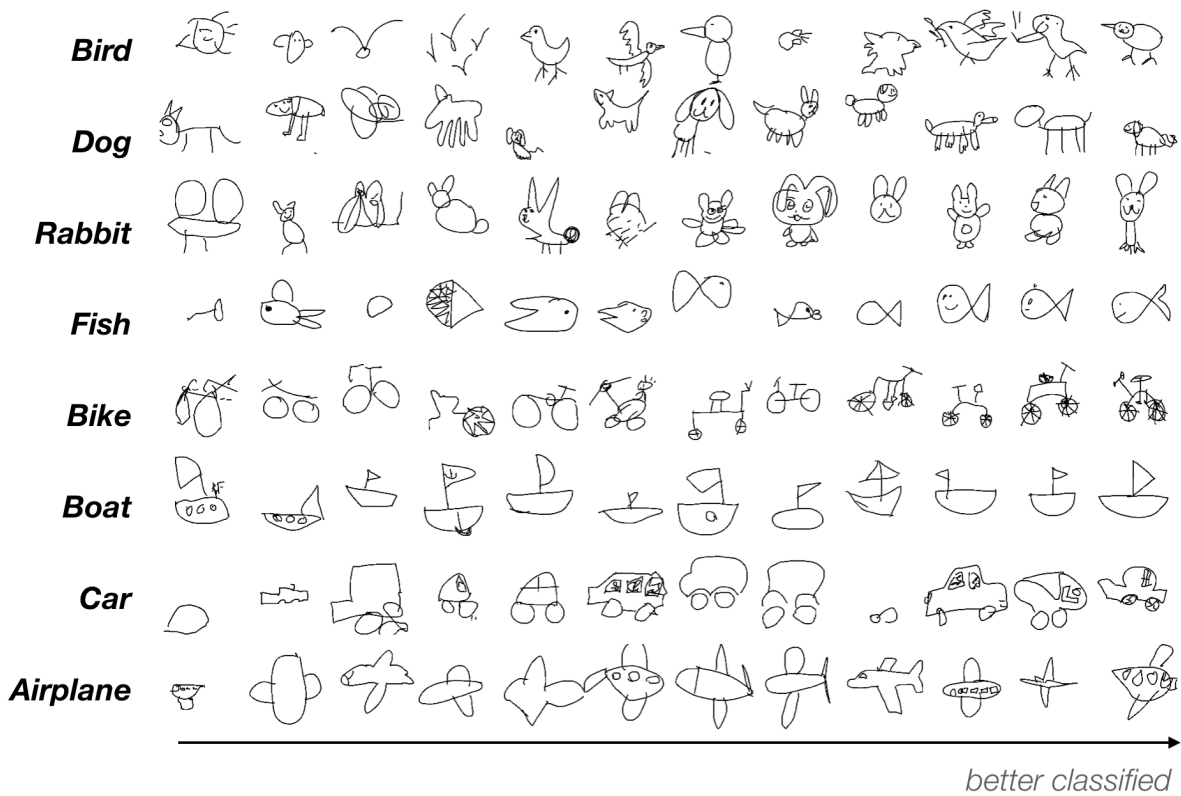

**Figure 1.** Leave-one-out classification accuracy (A), the amount of time spent drawing in seconds (B), the amount of ink used (i.e., mean intensity of the drawings) (C), and the number of strokes used (D) are plotted as a function of children's age.

**Figure 2.** Randomly sampled drawings from eight categories ordered by the probability that the sketch was assigned to the correct target category; all sketches depicted here were correctly classified.
